Supporting Information Figure 3. A2MG does not display direct antibacterial actions. 10 µg of ampicillin (as a positive control), sA2MG (1ng-1µg) or vehicle were each placed on LB agar plates containing (A) *E. coli* (1.7x10^7 CFU) or (B) *S. aureus* (1.7x10^7 CFU). The zone of clearance was assessed after overnight incubation at 37°C. Photographs represent n=3.
