Supplemental Figure 1: Age-dependent progression of heart failure in the male HCM mouse.

(A-C) Echocardiographic timeline of cardiac morphology and function (A, left ventricular internal diameter in systole; B, mass; C, fractional shortening) in WT and HCM males. Mean±SD; t-test; n = 4-10. *Significantly different (P ≤ 0.05); ** (P ≤ 0.01) from WT control.
