Table of Contents

• Figure 1: GDAs$^{\text{BMP}}$ promote survival of cortical neurons exposed to 6-OHDA in vitro. Page 1
• Figure 2: BMP4 does not protect striatal TH+ neurons against 6-OHDA toxicity. Page 2
• Figure 3: Experimental time line of in vivo experiments. See material and methods for details of procedures. Page 3
• Figure 4: Transplanted hGDAs$^{\text{BMP}}$ persist in the rat striatum. Page 4
• Figure 5: GDAs$^{\text{BMP}}$ promote recovery of tyrosine hydroxylase expression in 6-OHDA lesioned animals. Page 5
• Figure 6: GDAs$^{\text{BMP}}$ promote recovery of synaptophysin expression in 6-OHDA lesioned animals. Page 6
