

**Supplementary Table S4. Number of unique protein targets and number of antibodies per target.** Excluding the assay control analytes, the antibody set used in this study consisted of 380 antibodies targeting 315 unique proteins. For 56 out of 315 targets, there were two or more antibodies available in the set, which were raised towards different parts of their respective protein targets.

	<b>Nr of Unique Protein Targets</b>	<b>Nr of Antibodies per Target</b>	<b>Nr of Antibody Pairs per Target</b>	<b>Nr of Antibodies</b>
	259	1		259
	48	2	48	96
	7	3	21	21
	1	4	6	4
<b>TOTAL:</b>	<b>315</b>		<b>75</b>	<b>380</b>
